- Rescue strap with additional D ring
- Fitted with rip stitch indicators
- Fully adjustable

Size: Small, Standard, Large and X-Large
Please refer to the harness size guide

The RGH5 is designed for use as a confined access harness. When used, the rescue strap keeps the operative in a near vertical position, which is preferred when recovering an unconscious casualty.

- The front and rear attachment points can be used as standard fall arrest points and the rescue strap can be used for lifting and lowering.
- The rescue strap can also be used in certain fall arrest situations. Improved with a new, additional D ring for rear attachment, longer webbing and refined hook and eye fastening that is easier to disband in the event of a rescue.
- This harness is also available with quick release buckles.

Fast fit buckles are also available with the RGH5
